

The **main purpose** of the Foundation is to support young adults in accomplishing their dreams of having children.

Three Princes, Three Princesses Foundation 2018

Three Princes, Three Princesses Foundation

Our Movement, founded by Professor Mária Kopp, has been working since 2009 to reduce the gap between the number of the desired, children planned and the number of children born, so that young people can realize their family-related dreams.

To be able to give birth to planned children.

To reach our goal, our Movement pays attention to

- changing attitudes,
- community building,
- professional and scientific activities,
- active public participation,
- professionally supporting decision makers

We believe in collaboration

Our organisation has a number of supporters from reputable representatives of various fields, to influencers, companies, other civil organisations, and the broader layers of the political elite.

In 2013, the Movement proposed a statement to the five parties in Parliament. In signing the statement, they pledged to support parents and families in their work.

According to the research of Professor Dr Mária Kopp, the difference between the number of children planned and those actually born is highest among graduate women. Among other things, this difference is caused by the duration of their study time, starting and building a professional career, and the difficulty in reconciling life and career.
